

CLEANROOM GOGGLE SERVICE
COMPLETE CONTAMINATION CONTROL

Goggles service

Final step towards contamination control

High comfort and satisfaction

We make sure each operator has a minimum of three pairs of goggles in circulation, ensuring there is always a clean pair available.

Savings and flexibility

Berendsen provides the procurement, cleaning, packing, stock and circulation of your goggles.

You have time and money left to focus on your company's core competencies.

Full protection

Contamination free goggles everytime

Available from Berendsen Cleanroom Services, our goggle retains its visual transmittance through its lifespan and is comfortable for extended wear.

- Entire goggle is gamma stable & retains lens clarity up to 20 irradiation cycles
- ANSI Z87 Compliant
- Berendsen bespoke anti-fraying strap
- Strap contains unique barcode for tracking
- Gamma compatible buckles
- Oversized indirect vents to limit fogging and improve air flow
- Shroud reduces deterioration & warping
- Shroud is custom designed to accommodate prescription glasses
- Shroud fits flush & comfortably on the contours of the face
- Large lens offers superior peripheral visibility
- Fully Validated service process

Gamma Irradiation

Hygiene and safety guaranteed

The Berendsen Goggles are cleaned, packed and gamma irradiated and operators can enjoy a clean, particle free view.

This goggle is highly durable and retains its visual transmittance through a life span of 20 irradiation cycles, whereas other goggles can only be used from one to eight times before they must be discarded.

Benefits for you include full eye protection for the wearer, reducing landfill costs thus having an environmental benefit, no upfront purchasing costs, full traceability throughout the lifetime of the goggle and certificates of sterility with each delivery.

The goggle is ANSI Z87 compliant and is validated and generally appropriate for use in both aseptic and non-aseptic environments. Your employees are protected from the risk of work-related accidents.

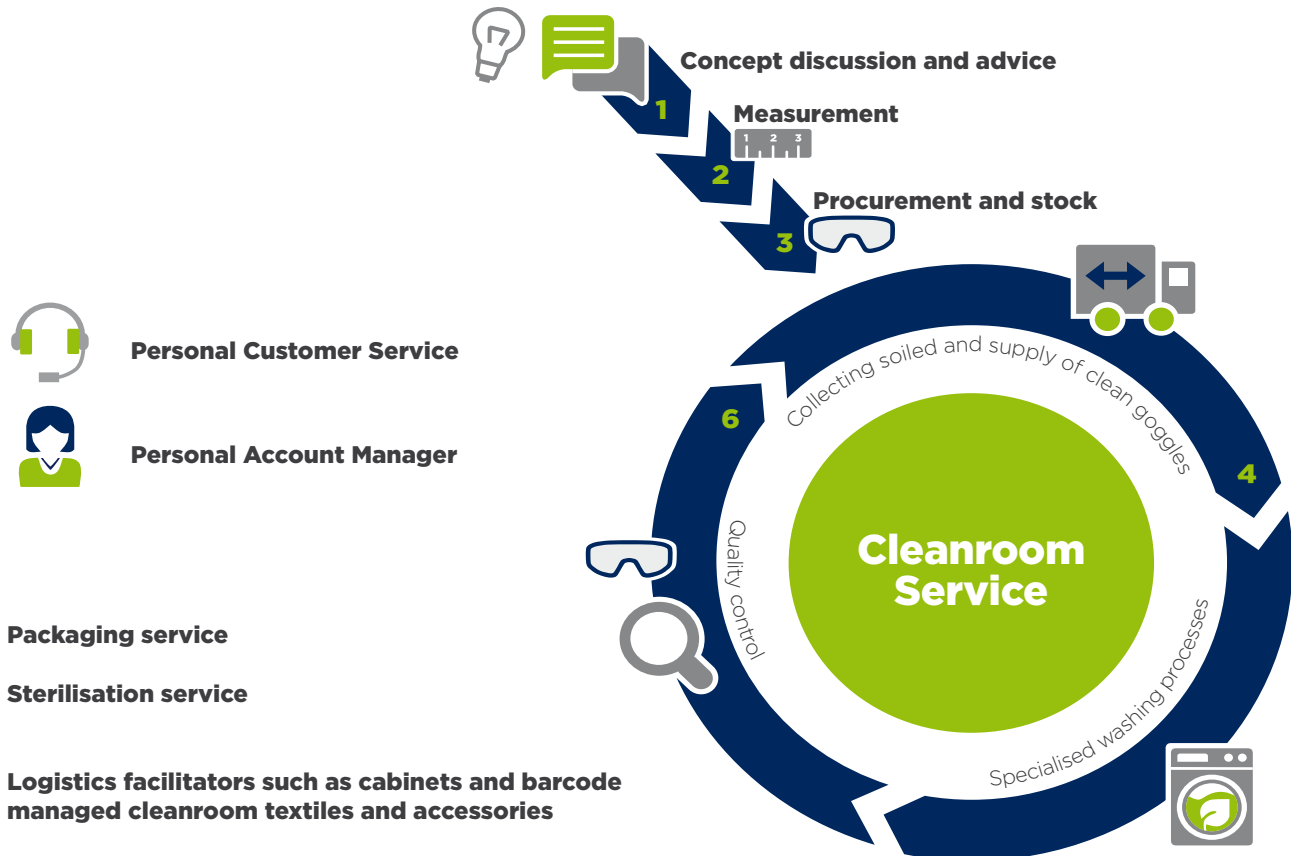

L-R goggles after 20 cycles of gamma irradiation and pre-irradiation

Berendsen Cleanroom Services

Focus on your core competencies

- As always, we take care of everything from purchasing, warehousing, administration, pick up and laundry, sterilisation and delivery of your goggles, so you can focus on your core competencies.
- Every goggle is scanned in our cleanroom laundry ensuring systematic replacement of goggles. Traceability also provides insight into goggles in circulation and helps control your assortment.
