CLEANROOM

Again is your circular choice.

We provide cleanroom laundry solutions that combine sustainability, innovation and quality.

R-MicronQuick wipes

This high-performance microfiber cloth is ideal for wet and damp cleaning of hard surfaces. Made from up to 70% recycled materials (post-consumer recycled polyester), it combines sustainability with advanced microfiber technology for superior cleaning.

Each microfiber is split into 32 segments, ensuring streak-free, lint-free cleaning with no water residue. Tested to remove up to 99.99% of viruses and bacteria, this cloth delivers exceptional hygiene.

Recycled content

Garments in recycled fabric

The product range includes cleanroom upper garments (hood, coverall, boots, and undergarments) made from recycled main fabric. These recycled fabrics meet the strict cleanroom requirements necessary for sensitive applications.

- 98% recycled content*
- 30% less CO2e emissions
 - 20% less water
 - 40% less energy**

*On main fabric level
**comparing resource consumption and emissions producing recycled and virgin polyester from plastic bottles

Replacing disposable materials

covers

Reusable covers and autoclavable bags offer a cost-effective and more sustainable alternative to disposable materials.

Our customised covers are designed for various operations, including equipment protection and internal sterilisation of tools and machinery. Easy to implement and tested in multiple countries.

No plastic packaging

Self-packing inner garments

Our self-packing garments, with its integrated textile pouch, allows to reduce plastic packaging while providing an additional barrier for your critical environment.

Our garments are comfortable, made of lightweight material and could save up to 4 kilos of plastic waste per operator per year.

92% of our plants are recycling in 2024.

These products are selected based on the Again criteria:
At least 50% recycled content or/and reducing disposable waste.
